Ranked by money at stake

CLEAR DEAD STOCK
$0.4M in 473 brands with no sales

LOWER REORDER POINTS
$10.2M has 180+ days of supply · pause reorders

FREIGHT: NO ACTION
Big vendors pay 0.50% to 1.02% · no action

Insights & Recommendations

Eight business questions, answered from the recalculated data

BIGGEST OPPORTUNITY

$7.4M

12 big vendors earn below 28.7%

BIGGEST WASTE

$10.6M

19% of inventory has 180+ days of supply

Top3 Spend Share

32.0 %

of all spend goes to just 3 vendors

#	QUESTION	WHAT THE DATA SHOWS	RECOMMENDED ACTION	IMPACT
1	Which vendors take most of our spend?	Diageo, Martignetti, Jim Beam make up 32.0% of the $321.9M spend.	Qualify backup suppliers and shift about 20% of top-3 volume over time.	32% → 26% top-3 share
2	Which vendors make the most profit?	Diageo, Martignetti, Constellation, Pernod Ricard earn $47.9M, 37% of the $129.7M gross profit.	Protect these relationships with volume-based agreements.	$47.9M protected
3	Why do some vendors look unprofitable?	Not a loss problem: only 13 small vendors lose $33K in total. The real gap: 12 big vendors earn under the 28.7% average.	Renegotiate cost prices and terms with the below-average vendors first.	Up to $7.4M
4	Which vendors turn stock fastest?	Portfolio turns 6.1× (about 60 days). Fastest: Sazerac 10.9×; slowest: Perfecta Wines 2.7×.	Cut reorder quantities for the slow vendors.	$4.3M cash freed
5	What ties up our inventory capital?	$10.6M (19% of stock at cost) has 180+ days of supply, including $0.4M in 473 brands with no sales.	Mark down or return dead stock; lower reorder points on slow items.	$10.6M at risk
6	Which cities hold the most stock?	MOUNTMEND 12.2%, EANVERNESS 8.5%, DONCASTER 7.8%. Top 3 = 28.5% across 69 cities.	No rebalancing needed. Monitor quarterly.	Low risk
7	Do purchase volumes match profitability?	Diageo buys 5.5M units at 25.9% margin; Jim Beam buys 2.7M units at 24.1% margin. Portfolio margin is 28.7%.	Add margin % and profit per unit to the vendor scorecard.	Margin-led mix
8	Are freight costs proportionate?	Freight is 0.52% of spend ($1.67M). Big vendors range 0.50% to 1.02%.	No vendor-specific fix. Review only at contract renewal.	No issue

Inventory counted once (closing stock) · turnover = COGS ÷ average inventory at cost · margin is weighted (profit ÷ sales)
